DETAILED ACTION

1. This action is in response to the appeal brief filed on 07/10/2006.
2. The rejection under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement to claims 1-18 is withdrawn in view of applicant's remarks/arguments.
3. The rejection under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter to claims 7-12 is withdrawn in view of Examiner's Amendment below.
4. The rejection under 35 U.S.C. 102(e) as being anticipated by Cox (U.S. 6,856,983) to claims 1-18 is withdrawn in view of applicant's remarks/arguments and Examiner's Amendment below.
5. Claims 1-18 are pending.
6. Claims 1-18 are allowed.

EXAMINER'S AMENDMENT

7. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Theodore D. Fay III (Reg. No. 48,504) on October 4, 2006 and October 5, 2006.

The application has been amended as follows:

In the Claims:

Please amend claims 1, 7 and 13-18 as follows:

1. (Currently Amended) A method for integrating information technology components into a single end-to-end application, comprising:

- decomposing a business process into a set of enabling applications;
- documenting the technology elements and support organizations which are necessary to execute and manage the enabling applications of the business process;
- deploying required monitors for the business process enabling technology;
- developing cross-platform contextual correlation logic and rules;
- mapping information technology severity to business impact severity, said mapping describing how technical problems relate to business processes including said business process;
- quantifying, using said mapping, business losses due to particular technical failures using the cross-platform contextual correlation logic and rules; and
- developing an end-to-end business process event management platform.

7. (Currently Amended) A computer program product in a computer readable storage medium, for use in a data processing system, for integrating information technology components into a single end-to-end application, comprising:

- instructions for decomposing a business process into a set of enabling applications;
- instructions for documenting the technology elements and support organizations which are necessary to execute and manage the enabling applications of the business process;

Art Unit: 2191

instructions for deploying required monitors for the business process enabling technology;

instructions for the development of cross-platform contextual correlation logic and rules;

instructions for mapping information technology severity to business impact severity, said mapping describing how technical problems relate to business processes including said business process;

instructions for quantifying, using said mapping, business losses due to particular technical failures using the cross-platform contextual correlation logic and rules; and

instructions for developing an end-to-end business process event management platform.

13. (Currently Amended) A computer system having means for integrating information technology components into a single end-to-end application, comprising:

means for decomposing a business process into a set of enabling applications;

means for documenting the technology elements and support organizations which are necessary to execute the enabling applications of the business process;

means for deploying required monitors for the business process enabling technology;

means for developing [[the]] cross-platform contextual correlation logic and rules;

means for mapping information technology severity to business impact severity, said mapping describing how technical problems relate to business processes including said business process;

using said mapping for quantifying business losses due to particular technical failures using the cross-platform contextual correlation logic and rules; and

Art Unit: 2191

means for developing an end-to-end business process event management platform.

Claim 14 (Currently amended),

At line 1, before “system according to” insert computer.

Claim 15 (Currently amended),

At line 1, before “system according to” insert computer.

Claim 16 (Currently amended),

At line 1, before “system according to” insert computer.

Claim 17 (Currently amended),

At line 1, before “system according to” insert computer.

Claim 18 (Currently amended),

At line 1, before “system according to” insert computer.

REASONS FOR ALLOWANCE

8. The following is an examiner’s statement of reasons for allowance:

The cited prior art taken alone or in combination fail to teach, in combination with the other claimed limitations, developing cross-platform contextual correlation logic and rules ... quantifying, using said mapping, business losses due to particular technical failures using the cross-platform contextual correlation logic and rules as recited in independent claims 1, 7 and 13.

The closest cited prior art, Cox (U.S. 6,856,983) teaches a method for integrating information technology components into a single end-to-end application. However, Cox (U.S. 6,856,983) fails to teach developing cross-platform contextual correlation logic and rules ... quantifying, using said mapping, business losses due to particular technical failures using the cross-platform contextual correlation logic and rules as recited in independent claims 1, 7 and 13; and as pointed out by the applicant's remarks/arguments in the appeal brief (Filed on 07/10/2006) on pg. 15, par. 2, and pg. 28, par. 3 to pg. 30, par. 4.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
